**DETAILED ACTION**

*Allowable Subject Matter*

1. Claims 1-17 allowed.

*Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 18-20 rejected under 35 U.S.C. 103(a) as being unpatentable over Delpech et al. (6,271,474) in view of Delpech et al. (EP 1 103 858).

Regarding Claims 18-20, Delpech et al. ('474) disclose an integrated circuit fuse with localized fusing point where in Figs. 5-9, column 2 lines 33-52, column 3 line 54, column 4, line 2, and column 6 lines 31-33, it is disclosed an integrated circuit having a minimum line width including a stringer fuse 20 having a low resistance metal silicide 46 with substantially less than the minimum line width. Delpech et al. ('474) fail to disclose the required method of manufacturing. However, Delpech et al. ('858) disclose a method of making semiconductor device where the required method of manufacturing stringer fuse is disclosed.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required method of making stringer fuse in Delpech et al. ('474) as taught by Delpech ('858) in order to manufacture a semiconductor stringer fuse.
